

## UNIQUE AND OUTSIDE THE SQUARE

When was the last time your delegates returned from a conference and exclaimed it was the best they have ever been to...because they saw one of the most majestic mammals on the planet in their own natural environment.

Yes – Whales. The Port Stephens Coast boasts one of the highest traffic areas for the migrating humpback whales every year. Our sightings have gone global, have featured on major television series, social media platforms and documentaries.

You can never really appreciate these creatures until you have been up close and personal. Expert commentary that is constantly being researched, experienced and passionate crew, purpose built sea capable vessels, it is one of the most incredible experiences that we offer right in our back yard. To be so close and not experience these incredible mammals in the wild would be like not having mints on the conference table.

## PRIVATE CHARTERED WHALE WATCH
